Subject: Security Warning: Another Round of Malware Attached Email
Date: Thursday, April 21, 2016 1:28:00 PM
Importance: High

Hello again CNRE,

The message below or variants of it are definitely making their rounds in the VT community. It is not legitimate and the attachment (which I removed before forwarding this one) does contain malware. If you get this or have gotten it do not open the attachment under any circumstances. Just delete the message. **Remember to never open an unsolicited email attachment.** Even if you are expecting it you should verify that the person actually did sent it to you. Thanks.

Lon

Subject: FW: Latest order delivery details

Good morning!

Hope you are good.

Yesterday and the day before my colleague (Ewing Audra) sent you a request regarding the invoice INV_653-2016-exchange.vt.edu past due.

I kindly ask you to give us a reply finally. We're getting no answers from you. Please stop ignoring invoice requests.

Many thanks and good luck

Hugh Slater
