Subject: Security Alert: Highly Critical Java Update for the Mac
Date: Wednesday, June 29, 2011 8:32:56 AM
Importance: High

Hello CNRE,

This one is for Mac users only. Apple has just released an updated version of their Java plugin. This update patches multiple “Highly Critical” vulnerabilities so I suggest that everyone perform a “Software Update...” from the Apple menu ASAP. Note that this update will not require a restart. Thanks. Lon.
