**Subject:** Security Alert: Highly Critical Vulnerabilities in Adobe's Photoshop CS4

**Importance:** High

Hello CNR,

Adobe has just announced and released a patch that fixes three highly critical vulnerabilities in their Photoshop CS4 application. The announcement did not specify which platforms were affected which usually means that both the Mac and Windows versions are at risk. If you use this program then I highly recommend updating to the fixed version (11.02) ASAP. Since I am not a Photoshop user I don't have it installed but I'm assuming you can update it from the "Help" menu like most other Adobe products. Please do not hesitate to [contact us](#) if you have questions or problems. Thanks.  
Lon.
