**Subject:** Security Alert: Microsoft Office for the Mac Critical Update

**Importance:** High

Hello CNR,

Microsoft has released an update that addresses a couple of "Highly Critical" vulnerabilities in both their Office 2004 and Office 2008 suites. From the "Help" menu of any Microsoft Office application select the "Check for Updates" menu option. Install any update that it suggests and it shouldn't require a reboot. At least mine didn't. As always feel free to contact Chad at the [CNRHelpDesk@exchange.vt.edu](mailto:CNRHelpDesk@exchange.vt.edu) (1-9599) if you have any problems or questions. Thanks. Lon.
