Subject: FW: Phish bot

Importance: High

Hello CNR,

Please see message below. This one does a real good job mimicking VT's webmail interface if you click on the link in the message. If you have already fallen victim to this CALL 4-4357 (4help) immediately and have your PID password reset! I'm including a sample email below also so you can see the actual message. Thanks. Lon.

Subject: Phish bot

A well designed phish is making the rounds at Virginia Tech. Warn the people in your office that if they get anything from vata-vm.com (<http://www.vata-vm.com/vt.edu-login.html>), not to click on it and login. It looks as if they will be longing in to Virginia Tech webmail.

John Worrell
