Subject: Security Alert: www.dot.sws.dot.org Serving Up Ransomware
Date: Monday, December 19, 2016 1:55:36 PM

Hello CNRE,

It has come to our attention that the Society of Wetland Scientists (SWS) website is currently serving up Ransomware and I know that a few of you out there may visit that site occasionally as a resource. There is also a possibility that the www.dot.wildlife.dot.org website may be serving up Ransomware as well but this has yet to be confirmed. Thanks.

Lon
